

Perley Integrated Preschool Program Description:

We believe that Pre-K is a time for children to fall in love with the educational process. Instruction is based upon individual student strengths, needs, and preferences, implemented by EEC Certified teachers and paraprofessional staff. Staff members will provide a thoughtful and comprehensive experience, all within a trusted and safe classroom environment. Students will be placed in age specific classrooms, and instruction will occur in the areas of pre-literacy skills, mathematics, and science.

A large part of the program focuses on student social and emotional well being. With a goal of helping children become as independent as possible, they will be taught such skills as communication, making family and friend connections, recognizing and labeling emotions, and problem solving in a collaborative environment. Themes will include topics such as cooperation, empathy, taking responsibility, and maintaining self - control.
