

The Greenhouse Program:

The Greenhouse Program is composed of students along a continuum of disabilities who may receive special education services from a special education teacher, with assistance from trained paraprofessionals and services from a speech-language pathologist, occupational therapist, and/or consult with a registered BCBA. The Greenhouse serves students with a wide variety of disabilities, as well as meet the needs of typically developing preschool students who have the opportunity to integrate with students from the Greenhouse program. Students from the program are integrated into classrooms based on the decision of the IEP TEAM.
